

Wiring Guide

Overview

ScanImage 2016 supports two different imaging systems:

- ResScan (for resonant scanning)
- LinScan (for galvo/galvo scanning)

These two imaging systems can be used separately from each other, or in combination for simultaneous imaging and photostimulation.

Wiring Guides

Please review the following documents for information about wiring the imaging systems

- [Configuring ResScan \(Resonant Scanning\)](#)
- [Configuring LinScan \(Galvo Galvo scanning\)](#)

If ResScan and LinScan are used for simultaneous imaging and photostimulation, please review the article

- [Synchronizing ResScan and LinScan](#)
